

Abbotsford, Sumas & Matsqui News

Twelfth Year. No. 42

Abbotsford, B.C., Wednesday, October 16th, 1935

Ten Cents per Month.

FREE DENTAL TREATMENT FOR SCHOOL CHILDREN

Dental inspection of the 1,500 children attending Abbotsford, Sumas and Matsqui schools is now underway under arrangements effected by P. H. Sheffield, government trustee, with the provincial health and education departments. Through the Carnegie Foundation, funds have been made available to the provincial government to pay for treatment of children with defective teeth, and this service will immediately be instituted by local dentists, who have been retained at an established daily fee. Entire cost of the treatments will be met by government payments.

Medical inspection of school children is also being made by Drs. McDiarmid and Dunham, and they report "good average" health with a few exceptions in large families where indigence and malnutrition go hand in hand. Goitre, so common in another part of the valley, is not found in the Abbotsford district, although a tendency to this disorder was a previous examination noted in Sumas-Kilgard sections.

As largest of three "experimental" school areas under its control, the government is considerably interested in making its direction here a success and beneficial to the community.

Peardonville school is being enlarged to approximately twice its present dimensions, entire cost of the required material to be met by the government. Some 50 pupils are accommodated at present, and addition of the second division will provide facilities for 35 more.

SUMAS-MATSQUI COW-TESTING ASSOCIATION

The following herds averaged 30 lbs. or over of butterfat for month of September, 1935:

Herds of 16 Cows or Less	
H. E. Stewart	1207 44.4
Emil Anderson	961 43.8
A. E. Farr & Son	787 32.5
W. Gurney & Son	634 30.8
Herds of Not Less than 17 Cows	
T. S. Higgs	1005 46.0
H. O. Keefer	855 42.4
R. Machell	752 38.1
Mrs. C. Stafford	758 38.1
M. Anderson	953 37.1
B. Stewart	950 36.1
L. T. Beharrell	1010 35.5
T. F. Seldon	815 33.5
F. A. Beharrell	778 33.3
G. H. Rottluff & Sons	779 30.4

ROBERT A. WILSON
Supervisor

Final standings in the Sumas-Matsqui Calf Club are as follows:

Jerseys—Kathleen Olund, Ronnie Norrish, Billy Farr, Albert Zurovski, Harold Zurovski, Betty Whitson.
Holsteins—Howard Beharrell, Melvin Stewart, Ellnor Stewart, Bruce Fadden, Phil Fadden, Bob Machell, Glen Fadden, Fred Farr.

Mr. Robert A. Wilson is the field supervisor for the club.

CLAYBURN

Mr. and Mrs. F. A. Thompson are leaving Clayburn this week to reside at Newton, where they have bought a chicken farm. Mr. Thompson has resided in Clayburn for over 40 years.

An enjoyable affair was held at the home of Mr. and Mrs. Ivor Davis on Saturday evening, when they entertained a number of friends on the occasion of their fifth (wooden) wedding anniversary. Prizes at the progressive whist game went to Miss P. Ellerson, Neils Trowsdale and Mr. and Mrs. Felton. A copper kettle, a tea service and a cake plate were presented to Mr. and Mrs. Davis.

J. Virtue spent the week-end at his home here.

New Telephone Directory

Contract advertisers of The News again issue to the public this week an up-to-date telephone list of Abbotsford exchange subscribers. Copies of the directory may be obtained of The News and of Miss Clemente, chief operator of the B.C. Telephone Co. here. Cost of the production is borne by advertisers whose names are in black-face type, who ask, if it is appreciated, a measure of patronage.

M-S-A. General Hospital

Report for the month of September:

In hospital September 1st, 7; admitted during month, 34; new born, 6. Total—47.

Discharged during month, 38; died, 1; in hospital October 1st, 8. Total—47.

Medical, 11; major operations, 4; minor operations, 15; fractures, 2; obstetrical, 7; new born 7; T.B. 1. Total—47.

Matsqui 23 patients, 228 days; Sumas, 9 patients, 99 days; Abbotsford, 4 patients, 27 days; Vancouver, 2 patients, 2 days; Langley, 1 patient, 1 day; Unorganized, 6 patients, 61 days; Indian, 2 patients, 33 days. Total—47 patients, 451 days.

Card of Thanks

I tender my sincere gratitude to those who, during the election campaign, enlisted in the service of the Stevens Reconstruction Cause; also to those who gave, on my behalf, their vote and support on Oct. 14th.

GEO. F. PRATT

Card of Thanks

I desire in this manner to express my thanks to those who supported me in the recent election campaign by according me their vote and assisting me in various other ways. Notwithstanding the change in government, I shall continue my endeavors to merit this confidence by always prosecuting a fight for the best interests of my district and country.

HARRY J. BARBER

MATSQUI

Mr. and Mrs. R. A. Morris and family leave next week for Plymouth, England. The family came to Matsqui two years ago from New Zealand, but recently lost all their effects by fire.

The death occurred last Friday at Port Alberni of Mr. Louis Hendrickson, father of Mrs. W. Mailes of Matsqui. Mr. Hendrickson was an old-time resident of Matsqui prairie.

Mr. and Mrs. E. Borg and Mr. and Mrs. J. Anderson have returned from the Cariboo, where they spent the past three weeks.

Born.—To Mr. and Mrs. F. Wilson, at Mission hospital, a daughter.

A very successful tea was held in the church parlors on election day, Monday, under the auspices of Matsqui P.T.A. Proceeds were about \$16.

Mr. and Mrs. R. Brown of Vancouver spent the week-end visiting with friends at Gifford.

Mr. and Mrs. B. Hagen of New Westminster were week-end visitors at the home of Mr. and Mrs. O. Sorenson.

Mrs. A. Fore and Miss Olga Fore spent the week-end in Vancouver.

Sad news comes from Vancouver of the suicide of Alice Dittmer, a young woman who formerly resided with her parents in Matsqui. The body was found last week, thrown up by the tide, upon the beach at Marine drive. Two notes, left by the young woman, indicated that she contemplated suicide. Her purse was found on the sand at Jericho beach a few days previously.

A car belonging to Mr. John Olsen of Matsqui knocked over one of the gas pumps at the Ashdown service station on Wednesday evening. The driver left the car in reverse gear when he stopped for gas, and when he cranked the car to start again, the vehicle backed up against the pump—almost knocking it over. The gas line was severed for a few minutes, and a geyser of the inflammable liquid shot up into the air.

Young people formed the larger proportion of the crowd which attended the dance given in Matsqui hall on Friday by the Game Club. Berskins, deer horns and other hunting trophies adorned the walls of the hall, a good orchestra provided the music, and everybody apparently enjoyed the evening. Bill Kunzmann was in charge of arrangements.

Six satisfied hunters returned home from a nine-day trip in the Cariboo, bringing with them five moose as evidence that game is plentiful if you know where to look for it. The party was comprised of W. Groat, F. Matthews, B. Stevens, L. Bates, F. Fooks and K. Gillis. The moose were bagged about 50 miles west of Quesnel, and the hunters report little difficulty in sighting the animals.

Born.—To Mr. and Mrs. Joseph Klingner, Clearbrook road, on Oct. 13 in the local hospital, a daughter.

"NEWS ADS" BUILD BUSINESS

Abbotsford stores report "improving business," post-office receipts are substantially increasing, the theatre is showing four nights weekly with a satisfactory patronage, hotels and restaurants are doing better, the "News" circulation grows larger week by week—obviously there is more money in circulation, times are better.

Abbotsford is small, but it is a good business town. Proof of this is the rapid advance of several thriving businesses here, whose establishment started well under a decade ago—grocery stores, druggist, garages (one of which topped the Valley in certain sales this year), a bakery, restaurants and truck lines. One of the stores, which started on a very modest scale eight years ago, is said to exceed \$100,000 gross turnover annually, and now reports definite increases in each of its three departments.

Yes, Abbotsford is now proving to be a good business town—for those who "go after" that business.

MOUNT LEHMAN

Fire of unknown origin, breaking out on Sunday night, destroyed the residence of the late Mr. Spinney.

Miss H. Israel is visiting in Vancouver.

Mt. Lehman junior football team defeated the Jubilee team by a score of 7-0 last Friday. The game was played on the new sports field.

Guests of Mr. Forrester at the week-end were Mr. and Mrs. J. Anderson and Mr. and Mrs. D. Cuthbertson of Vancouver.

Born.—To Mr. and Mrs. G. Cox, Sumas Prairie, in the M-S-A. hospital on October 11, a son.

The Peardonville Live Y dance held on Friday evening was not very well attended, there being several other conflicting events.

An Appreciation...

Public approval of the Daly Stores merchandizing policy is apparent by the following increases in our sales, certified by a Chartered Accountant:

25% increase in Dry Goods dept.
20% increase in Grocery dept.
40% increase in Hardware dept.

(over corresponding period of 1934).

We are truly grateful for this great encouragement and will earnestly strive to merit its continuance by offering always high-grade goods at lowest market prices.

ABBOTSFORD

James Calvert was taken to the local hospital on Saturday night suffering from bruises and head injuries sustained when struck, it is understood, by a passing car. Mr. Calvert was walking along the Yale road west of Abbotsford, when he was hurt.

The residence of Mr. and Mrs. J. Banas, about three miles west of Abbotsford on the Yale road, was completely destroyed by fire on Wednesday evening. Only a few possessions were saved. The cause of the blaze is unknown, although sparks from nearby brush fires may have ignited the fire. Mr. Banas plans immediate erection of a new dwelling.

Roof of the old News building was re-shingled last week.

Week-end searchers for venison exhibited nothing for their strenuous efforts. Anglers did no better.

Mr. Jack Godson is seriously ill at his home.

Stanley Schnare resumed work this week, hauling logs by truck near Mission. He has been absent since August, when he broke his ankle while working.

Construction is almost complete of a residence for Mr. L. Lapinsky, old Yale road west of Abbotsford, replacing the one recently destroyed by fire.

Mr. J. Berg, who came here recently from the Peace River country with his family, is completing a residence on the plateau near the water tank.

Announcement is made this week of a dispersal sale at the farm of Mrs. Bishop, St. Nicholas. Some excellent cattle, farm equipment and effects are offered. Mr. B. Bevan is conducting the sale.

Orange lodge is unable at this date to finance plans for enlarging the hall.

WORLD HAPPENINGS BRIEFLY TOLD

For the first time in the history of the Bombay high court, a microphone and amplifier has been put in use in one of the chambers.

Field Marshal Lord Allenby, who celebrated his 74th birthday on St. George's Day, April 23, has an aviary stocked with many varieties of foreign finches.

A woman who cashed a cheque in an Edmonton bank wasn't taking any chances. The cheque read: "Pay to Mrs. —, 15 'Canadian dollars'". She got them.

Father John Louis Stacey, 38, died at the wheel of his car in Edmonton as he drove to a city hospital to get treatment for a heart ailment. The car crashed into another parked machine.

Indicative of the rapid mechanization of the Royal Canadian Mounted Police, not one saddle horse is stabled in the force's barracks at MacLeod, Alta. All animals formerly kept at southern Alberta detachments have been disposed of.

A few weeks ago Joseph Eckert, 15, collided with a buggy while riding his bicycle in Stratford, Ont. The shaft of the buggy went clear through the boy's body, an inch below the heart. Now he is up and around again almost as well as ever.

Two men were sentenced to five years' imprisonment for firing shots at a procession of Orangemen on the streets of Belfast, July 12. They were Thomas Connolly and Joseph McDonald. Several persons were killed and wounded in the July riots.

Vancouver is returning to a normal financial position "better than any other city in Canada," Ald. C. E. Tisdal, chairman of the civic finance committee, told the Retail Credit Grantors' Association in session in that city.

Will Not Accept Legacy

English Woman Dreads Curse Laid On Ancestor

Because she dreads an Indian curse laid on one of her ancestors who, she believes, despoiled a temple, Mrs. J. Schofield, of Heswall, near Liverpool, England, refuses to touch a legacy left by her mother.

Instead she will devote all the money to a religious cause, hoping that in this way the power of the curse will be broken.

Said Mrs. Schofield: "We need the money badly, my husband and I, but I am afraid to touch it. It comes indirectly from my ancestor's estate. My great-uncle won a law action against an Indian maharajah on December 13, 1844. It gave him jurisdiction over certain land on which was a temple dedicated to a vestal goddess.

"Two days later he was found in the temple, stabbed to the heart with a jewelled dagger. A piece of parchment with the curse written on it lay on the body.

"Note the two dates—Dec. 13 and Dec. 15. My father died on the 13th of a month; my mother on the 15th, in tragic circumstances. Other members of the family have died tragically on those two days.

"The curse particularly affected the women of the family. That is what decided me."

Deer Halts Ocean Liner

Navigation Stood Still Until Swimming Animal Was Rescued

A young buck deer went for a swim along the Vancouver waterfront and the episode proved so momentous it halted an ocean liner, brought out a police cruiser and even impeded the British navy.

A longshoreman waiting to work the Empress of Japan saw the deer swimming in the harbor and noticed the animal was tiring. His shouts brought a police launch to the scene and excitement ranged along the half-mile of the waterfront.

H.M.S. Danae, leaving for Victoria, rounded its siren, the S.S. Princess Marguerite, a ferry boat, a cargo ship and a number of smaller craft halted in their courses as the police boat performed a rescue. Slipping a noose over the head of the weary animal, it was hauled aboard the launch. The buck was later released on the north shore and navigation continued.

Picture Well Preserved

A picture of King Edward VII, chiselled in the coal wall of the Marsh Mine more than 25 years ago by Engine-driver John Campbell of Westville, Nova Scotia, was found to be in a remarkably good state of preservation when the mine was being dewatered. The Greenwood Coal Company was having the colliery dewatered to work in new coal areas.

Cane Sugar Growers Worried

Afraid Beet Cultivation In United Kingdom Will Run Industry

With the United Kingdom Government subsidizing beet sugar at home, the British West Indies and British Guiana are wondering what is to become of their cane sugar industries—already depressed by low prices.

Barbados, whose only possible crop for commercial purposes is cane, is particularly anxious to ascertain how far the Imperial Government intends to go with the cultivation of beets for sugar.

This island of 106,270 acres has 100,000 acres under cultivation, and of a population of 180,000 about 120,000 colored people look to the sugar cane plantations for employment.

Nearly all the planters are now in debt to the banks and are growing cane only in the hope of better times, and in order to support the enormous working population.

Should they be obliged to abandon sugar, the island would be penniless, it is said. There would be no question of dole, because all the colony's taxes come from the planters, and with their ruin the chief source of revenue would be shut off.

Some of the other islands with different vegetation have a better outlook. Grenada, for example, is making up for sugar losses by devoting much land to cultivation of other crops, and has been successful this year with bananas grown under a supply contract for a Canadian company.

Coached Popular Actor

Edmonton Man Taught Chevalier To Speak English

The man who taught Maurice Chevalier to speak English in a German prison camp at Alten Grabow, Germany, during the war lives in Edmonton to-day. William King, who enlisted from Edmonton at the first of the war and spent his 17th birthday in the front line at Ypres salient, became a pal of the French movie picture singer behind the electricity charged barbed wire of the prison camp.

Captured during the first gas attack, King spent some time in a German hospital and then was placed in Alten Grabow camp. There he met the handsome young Frenchman, Chevalier, and for nearly a year was his constant companion.

Unable to speak a word of English, Chevalier was coached by King to speak and sing in English. They even put on a musical show in the camp to brighten the long prison hours. "Before Chevalier was repatriated he had mastered the language fairly well and was extremely grateful to us," King said.

Stratosphere Flights

Famous Flyer Says This Method Is Not Practical

Col. Roscoe Turner, America's dashing cavalier of the air who has formed the habit of roaring across the continent in a few minutes over 10 hours, on a visit to Toronto, said stratosphere flying was a "practical impossibility."

"When you get up in the thin air, have to supercharge your motors and make the cabins air-tight, the cost becomes prohibitive," Turner said. "The world will never see commercial flying in the stratosphere. A medium will be established half way between the stratosphere and the present air lanes where commercial planes can operate most economically."

One Of Queerest Jobs

Man Is Wasp-Catcher To Firm Of Chocolate Makers

The News of the World, London, says one of the queerest jobs in the world is that of a man who is wasp-catcher to Fry's, the chocolate makers, whose employees were being pestered by the insects.

During May and June he destroys as many queen wasps as possible to prevent their breeding. From July onward he scours the adjacent fields and destroys nests. Expert as he is, he sometimes makes a slip, and recently he was compelled to divest himself of his shirt, into which over 40 infuriated insects had penetrated.

Loses Its Identity

Like the little girl who was wont to lose her whereabouts, Canadian flour occasionally loses its identity. Practically all of the flour imported into Haiti is of Canadian origin, but the greater bulk of it is being shipped to Haiti through United States ports is billed as a U.S. product.

The possessions of France consist mainly of small islands in the Atlantic, Pacific and Indian oceans, with continental territories in Africa, South America and Asia.

AT HISTORIC CAIRN

—Canadian Pacific Photo.

Sir Edward Beatty, G.B.E., chairman and president of the Canadian Pacific Railway, is shown here with little Joyce Austin, daughter of W. T. Austin, section foreman at Craigellachie, B.C., following Sir Edward's recent visit to the Craigellachie cairn which marks the spot where Lord Strathcona on November 7, 1885, drove the last spike completing the Canadian Pacific Railway from ocean to ocean. On behalf of Craigellachie's handful of citizens Miss Austin presented the C.P.R. president with a bouquet of home grown flowers, a tribute which Sir Edward acknowledged with a hearty handshake. Sir Edward visited the memorial cairn in the 50th anniversary year of C.P.R. history as it will be 50 years on November 7 since Lord Strathcona drove the momentous spike.

Value Of Grain Crop

Western Crop Estimated Value Placed At \$241,381,000

Western Canada's grain this year will be worth more than at any time since 1931, according to an estimate by the Winnipeg Free Press.

Based on present prices, says the estimate, the total 1935 grain crop will bring \$241,381,000. The paper, using its own 274,764,000-bushel estimate, says wheat will be worth \$156,615,000 at the Fort William figure of 74 cents a bushel (price for average minimum grade) less 17 cents average haul.

Thus, says the paper, the total 1935 crop is \$82,186,000 more valuable than the 1931 crop, \$159,195,000; \$82,857,000 more valuable than 1932, \$158,524,000; \$71,338,000 more valuable than 1933, \$170,043,000; \$18,326,000 more valuable than 1934, \$223,055,000.

Jasper-Edmonton Highway

Believe Arrangements Made To Ensure Construction

Climaxing a 15-year fight, construction of a fully-standard, all-weather highway from Edmonton to Jasper appears assured at last, according to an announcement by acting Premier Manning that satisfactory arrangements for taking over the abandoned railway grade section of the highway had been completed and sufficient funds secured to guarantee the necessary construction, which will consist mainly of widening the grade.

Approximately 11,900,000 words are spoken annually by the average man.

In The Olden Days

Women Raced Their Own Yachts When Victoria Was Queen

Recent yachting activities reminds a writer in Overseas that before bicycling bloomers loomed on the horizon of emancipated womanhood the fair sex was already challenging the supremacy of man in the sailing competitions in British waters.

Even as far back as the reign of Queen Victoria there were at least six women racing their own yachts in the Solent, and in 1889 the first of the "ladies' races", which are now so popular a feature of every yacht club regatta, was sailed.

In 1890, however, the activities of these "Solent sailoresses," as they were called, received something of a set-back, for although races were especially provided in the program of a certain club, some owners objected to this form of sport and for several years the Solent yachtswomen were kept somewhere in the background.

Early in the present century this objection seems to have died down, and women were once more owning and sailing their own metre boats, not only in their own races, but in competition with what was then known as "the sterner sex."

They did not find it necessary to don shorts or trousers, these yachtswomen of the days when the King was Prince of Wales, but put valiantly to sea in long skirts and big hats, tied under the chin with motor-ing veils. These would be considered impracticable and even dangerous by the sailoresses of 1935.

As a general rule, large birds live longer than small ones.

Flies With Clipped Wings

Homing Pigeon Proves They Always Return If Possible

One thing about a homing pigeon is that it will come home to roost if that is at all possible. Witness the case of one just restored to its Montreal owner by Canadian National Express with the valued co-operation of Mrs. Elizabeth Bruce, of Huntingdon, Que. A few days ago an obviously exhausted pigeon fluttered to earth at Huntingdon and Mrs. Bruce, knowing that the Express Company sometimes handled these flyers, notified C. E. Bellerose, General Manager of the Express Company, of the fact, giving the identification marks on the pigeon's leg band. By these numbers Mr. Bellerose located the owner, M. Delorme, Jr., of 2318 Masson street, Montreal, to whom the bird was safely returned. When captured the bird's wings were found to have been recently clipped. Mr. Delorme recognized the pigeon as one released at Medonte, Ont., about 300 miles from Montreal. Not having reached home in reasonable time it had been given up as lost. Now the apparent explanation is that some person in Ontario captured the bird and clipped its wings. When the flight feathers had grown out again sufficiently, however, the bird had taken wing and reached Huntingdon before it became exhausted in its attempt to reach home.

These Frogs Are Different

Species Shown In New York Skip Tadpole Stage

Three young frogs no larger than houseflies, hatched in the biology laboratories of the American Museum of Natural History, New York, were on exhibition along with several hundred other amphibians, reptiles and fish at the annual show of the Aquarium Society.

Visitors rubbed their eyes when the three frogs, known scientifically as eleutherodactylus johnsoni, hopped onto a dime, leaving room for six or eight more.

Dr. G. Kingsley Noble, curator of the museum's department of experimental biology, explained smallness was not their only unusual characteristic. They were one of the few species of frogs, he said, which had no tadpole stage, the young being ready for business as soon as they popped out of the egg.

It developed some time back in their dim past, they had a tadpole stage but eventually found themselves in a pretty pickle with hardly enough water handy for a tadpole to swim in. Apparently resourceful amphibians, they just eliminated the tadpole stage and started laying their eggs on land. Dr. Noble said it probably took a good many thousand years but they did it.

Turn Trains Into Arsenals

Japan Takes Extra Precautions To Cope With Bandits

To cope with bandits, who have been attacking trains on the Hsinking-Tumen line, the Mukden Railway Administrative Bureau will protect passengers and crews. According to plans just formulated, the number of Japanese and Manchoukuo railway police on the line will immediately be equipped with machine guns, hand grenades and wireless apparatus. Also, a special rear engine will follow each train to guard it against attacks from the rear. Carrier pigeons and police dogs will also be used on the line to facilitate communication between stations.

New Place To Go

Stratosphere May Be Popular Honey-moon Resort Some Day

"It is almost safe to prophesy that our children's children will spend their honeymoons in the stratosphere or their summer holidays in the ozonosphere." This was declared by Colonel E. B. Mackintosh, director of the South Kensington (England) Science Museum while receiving the gondola of the balloon in which Professor Piccard made his second historic ascent into the stratosphere. The balloon, which has been presented to the museum, left Dubendorf Aerodrome, near Zurich, and after a flight of 12 hours landed on Lake Garda. The maximum height reached was about ten and a half miles.

Many Chinese in Shanghai carry their pet canaries about with them and organize singing contests between the birds.

Older than Rome's famous roads, was a road built by Assyrian King Sargon the Second to link Nineveh with another town.

Enough heat, is lost by the human body in one hour to raise a half gallon of water to the boiling point.

Africa's Oldest Empire

History Of Abyssinia Ranges Over Thousands Of Years

Harold J. Shephstone, F.R.G.S., wrote the following article for the Edinburgh Scotsman:

Whatever may be the fate of Abyssinia as a result of the present dispute between this age-old African Empire and Italy, some reference to this remarkable land, her history, the strange mentality of her people, and their quaint customs and ways may prove of timely interest.

Her history is an ancient story of fact, legend, and tradition, ranging over thousands of years. On one occasion her present ruler, Emperor Haile Selassie, prepared for a friend of mine a list of her rulers. It contained the names of 312 sovereigns and extended back over 6,300 years, to 4,530 B.C., or the 97th year of the creation of the world, according to Abyssinian computation. Included in this list were Solomon and the Queen of Sheba, from whose son, Menelik, the ruling house claim direct descent, which would give them a pedigree of the somewhat unusual length of 3,000 years.

Despite her long history Abyssinia, shut off from the rest of the world by towering mountains and barren deserts—"the world forgetting, by the world forgot"—her people have maintained an inviolability almost Tibetan in its character. As a result the mentality of her people and the condition of most of the country have remained virtually unchanged during the passage of centuries. They live much as they did two thousand years ago.

True, Addis Ababa, the capital is now connected with the outside world by a railway—a single line which runs between it and Djibouti, the port of French Somaliland. This is the only means of communication in a country about twice the size of Germany, or some 350,000 square miles in extent. The trains only run by day, out of respect to the proclivities of the Danakil tribes, who commandeer the rails for spearheads and the copper telegraph wire for bangles. In the wet season, moreover, travellers often spend three or four days covering the 500 miles between Djibouti and the capital owing to the permanent way being washed out by heavy rains.

The people still wear the old dress which seems to have been theirs since time immemorial. This consists of a cotton shirt, trousers, and the chama, the latter being a kind of cotton scarf worn like a toga during the day and used at night for a bed covering. The costume is the same for men and women and for all classes. The method of draping the chama is indicative of the attitude of the wearer towards the person in whose presence he may be. Thus to draw it across the face would imply contempt, whilst to drop it off the shoulders and gather it round the waist is the highest form of respect.

Impromptu courts of law, where any passer-by may be called upon to act as a judge, are still held at every street corner, and any trivial dispute is settled with much improvised oratory and an appalling waste of time. Rough-and-ready justice, according to the Mosaic code, holds the field for more serious crimes. Until recently it was quite a common sight to see half a dozen men swinging in the market place from improvised gallows or trees. Now murderers are executed in a little hut in the town, wherein they are tied to a post, rifles are trained on them through tubes in the wall, and the triggers are pulled by the relatives of the murdered man.

Very few Abyssinians outside the priesthood and the officials of Addis Ababa are able to read or write. The people as a whole are quite illiterate, and letters are not signed but sealed. The Emperor alone is entitled to place his seal at the top of his letters; everyone else's appears below the writing. It is a graceful script and a picturesque language; but, as there are 231 letters in the alphabet, besides about twenty compounds of these, Amharic is not exactly a subject that can be acquired in a week-end.

Monument To Horse

A horse's monument erected to the "Unknown War Horse" has been unveiled in the courtyard of the Francis Joseph Cavalry Barracks in Budapest, Hungary. The monument was erected on the initiative of General Stephen Horthy. After the unveiling ceremony the horses of the Regiment of Hussars quartered in the barracks filed past the statue, led by their riders.

A wreath of bananas was laid on the grave of Samuel Davenport, "banana king" of Waiworth, London, when he was buried at Nunhead, England.

Household Arts

by Alice Brooks

These Cuddly Toys are Quickly Made

PATTERN 5255

Soft, cuddly animal toys are the favorites of nursery-age youngsters and wise is the mother who realizes how easily and cheaply such toys can be made. No need to buy new material for these; the left-over scraps of calico, chintz or other novelty cottons are adequate and so colorful. With only two simple pieces required for each toy, not counting the ears and elephant's blanket which are separate, the stitching and stuffing are completed in no time at all. Then watch the merriment when you bring out long-eared Peter Rabbit, the terrier that's smart as a whip, and the elephant "just like we saw at the circus!"

In pattern 5255 you will find a transfer pattern for the animals shown; directions for making them and material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published!

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and misses the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy finds that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy and Matthew Adam go Christmas shopping in a neighboring town. On their return to Pine Ridge, Nancy is amazed to see the Columbine residence all lit up, and asks Matthew if he knows why. He said: Let's go in and see. Then Nancy learns that she is having her debut, but in a different setting than had been planned for her in Boston. Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Adam painted a sign for the library, and the Adam boys worked on the shelves for the books and decorations to make the room look presentable.

Jack Nelson, Matthew Adam, and Nancy go to the prairie home of Matthews' uncle for the ride, and after Nancy and Jack leave for home, they are caught in a blizzard. Now Go On With The Story

CHAPTER XVII

The ride to Prairie Ranch had been a jolly one, and a new experience to the young Nelsons. "Uncle Tom and Aunt Emily" welcomed them warmly, and even suggested that they stay a day or two, so Mark would be able to accompany them home; but Jack demurred.

"With both Matt and Mark away, Mr. Adam needs me," he explained, "and what's more, I think we'd better start right back if we're to go alone. Soon as Mark's better we'll be glad of the chance to come and get him; but really, I'd feel easier to go back to-day."

"He's right, Matthew," commended Uncle Tom. "It's not quite fair for me to steal two of your father's sons and his hired man as well! And as Jack says, it's better for them to start soon and take their time. Run up and say a word to Mark, you two,

"I'll Tell Anybody Gin Pills are Good"

—writes a Lunenburg, N.S., man who had suffered from Rheumatism. He further states: "I cannot praise Gin Pills enough. After using them I am now able to go around without a cane."

If your kidneys are not efficiently disposing of the waste matter in your system excessive acidity may develop, resulting in painful joints, sciatica, lumbago. At the first sign of kidney trouble take

GIN PILLS

FOR THE KIDNEYS 29

while Aunt Em gets you a good lunch. You won't mind eating early after the long ride."

"I never saw my sister refuse food, early or late, ride or no ride," grinned Jack as they went upstairs.

They were away by noon, regretful not to stay longer with this hospitable family, but glad to think they would return so soon.

"These plains are such surprising things," said Nancy, when Prairie Ranch and its big cottonwoods were miles behind them. "From a distance they look flat as a huge billiard table. Who would believe that there are mesas and hills out here?"

"I like the prairies better from a distance," confessed her brother. "They're so desolate and lonely when you're on 'em, Sis. Makes you feel no bigger than a mosquito, and about as important! It's great to come out here and see them; but give me the mountains as a steady diet. I—"

The boy paused, brushing one hand against his cheek.

"Queer, but I'd swear a snowflake hit me! Why, there's another! Strange to see snow drift down this way while the sun's still shining."

"I've seen that happen several times this winter, but it never amounts to very much." Nancy peered curiously at the heavens. "Just see that cloud, Jack! How fast it's moving. I bet that's where your snowflake came from."

A worried wrinkle appeared between Jack's eyes.

"Maybe Cousin Columbine was right, and we're in for a storm."

Nancy laughed.

"Lost on the prairie in a blizzard on the twenty-sixth of March! It would be some story to tell the folks back home!"

Jack said, his eyes following the cloud: "Don't tempt Providence, Sis. That cloud is turning ink; and blizzards on these plains are something awful, they come so suddenly. Mr. Adam told me about a time—"

A gust of wind was on them before Jack finished speaking. Big balls of tumbleweed scurried across the prairie; and clouds of dust obliterated the road.

"Perhaps we'd better turn and go back," suggested Nancy, ducking her head against the particles of dust. "Cousin Columbine insisted we mustn't start in any sort of storm, you know, and—" (her voice rose in alarm) "and it's really snowing! It's beginning to snow hard!"

The boy leaned forward, scanning a sky that grew darker with incredible rapidity.

"How far back did we pass that schoolhouse?" His voice, Nancy noticed, was tense, unnatural. "I don't want to scare you, Sis, but this looks bad to me. If we could reach the school I'd take a chance at waiting there until the worst is over. What do you say?"

"I say we keep right on to the first ranch. That school was six or eight miles back; and when we passed I noticed particularly that the bus had left. Perhaps they closed at noon to-day."

A stinging flurry of snow was on them now, cutting across their faces like a whip. For a moment it took Jack's breath away; then he replied: "I guess you're right. There was a ranch somewhere along here. I remember seeing the gate and mail box. Help me into this jacket, will you? I don't want to stop the car. Gosh! Nancy, we're headed straight into the storm. That's it!" (as she struggled to get his arm into a sleeve), "don't bother about the other. Get into your own coat quick — or wrap it round you. Look at this snow! The windshield's covered already. I'll have to get out and wipe it off."

"Are there any side curtains in this old car?" cried Nancy as they started on after a short delay.

Jack shook his head as he bent tensely above the wheel.

"Darned if I know; and you couldn't put 'em on in this wind anyway. Keep your eyes peeled for that mail box, Nancy. We mustn't miss

it. We—we can't miss it. Do you understand?"

Nancy understood only too well. There followed a mile or so when neither spoke. Twice Jack got out to wipe the glass, while his sister, staring into the wind-swept space, fought terror. Snow was descending fast and furiously now. Indeed, as they kept on doggedly it seemed incredible that this was the same bare road they had traversed so short a time before with friendly sunlight dappling the plains on every side. It might, thought Nancy, have been snowing here for hours and hours. Could it be possible that they were off the road? Straining her eyes into the drifting white, watching in desperation for the wayside mail box, visions of frozen cattle rose up before her, and the girls heart thudded.

At last Jack said, not looking at his sister: "We've missed that ranch, Nancy. It can't have been as far as this. What say we turn back now and try to reach the schoolhouse? The wind would be behind us anyway; and as it is I can't see four feet ahead. It looks to me as if our best chance was to—"

The words were silenced by a cry from Nancy, a cry of warning that came too late. Jack jammed on the brakes so suddenly that his sister was thrown forward against the windshield just as the car collided with the engine of a big school bus, which stood, its back wheels resting in a snow-filled gully as it extended crazily across the road.

CHAPTER XVIII.

As Nancy righted herself again, her eyes met Jack's, a glance of stark despair passing between them.

"I'm afraid that crash has finished this old car," he told her; then added: "Why, Nancy, I think that bus is full of children!"

"Hi, there!" came a voice almost at his elbow. "Had a smash up, didn't you? Did you meet Clem?"

Jack turned to see a boy of perhaps eleven, standing amid the swirling snow.

"Skip back into that bus, kid," he shouted, "we're coming too."

He was already out, stretching a helping hand to Nancy, and together they fought their way to the door of the stalled bus, the youngster calling over his shoulder: "Watch where you go there! Don't step into that deep rut, Miss—you gotta jump it." Then as the door flew open to admit them and Nancy, exhausted, sank into the nearest seat, he continued with a captivating grin: "We got company, kids. These folks is changing cars at this station. Say" (turning to Jack), "did Clem Johnson send you after us?"

Jack shook his head, and glancing about the bus, inquired: "Is he your driver?"

"Just for to-day. Our regular driver's sick," explained the boy. "Came down with an awful pain when he was sweepin' out the bus this morning, and his wife got Clem to drive us. Teacher closed school early because there's some sort of convention in Denver to-morrow, and she wanted to take a train this afternoon. The storm came awful sudden, after we left; and when we got this far Clem said we'd better get back to Bartlett's ranch fast as we could. 'Tisn't more'n a few miles east of us; but when he tried to turn, the wheels went into that gully and somethin' broke. Clem worked for a long time and couldn't fix it."

"So he went for help?"

"That's it. He thought he'd get there easy; but the wind got something fierce after he left. We told him not to go, but he said we'd freeze to death out here and 'twas up to him to get us somewhere safe. He's been gone a terrible long time though. Say, what's your name?"

"Jack Nelson; and this is my sister Nancy. What's yours?"

"Tom Osgood. I'm the oldest feller here; but two of the girls are older'n me. What do you s'pose became of Clem? He ought to be here."

At the front of the bus two children began to cry; and looking about at all those helpless youngsters, Nancy forgot herself. There must be fifteen of them; and two lovely little girls, obviously twins of seven or eight, wore only sweaters over summer dresses. How cold they must be!

"Look here," she said, rising to speak quietly, "these poor kiddies are getting frightened. We must divert them, Jack—play games of some sort—keep them moving as much as possible in this crowded place. Why, I'm cold already even with this coat, and not one of those children is dressed as warmly! Let's start romping soon as I put my sweater on one of those little girls."

This worked for a time, and the smallest children, not realizing their plight, laughed with delight at the games Nancy invented. The older

ones, however, grew noticeably quiet as time passed, trying to peer out of the snow-covered windows, and speaking together in low voices.

At last Jack and Tom Osgood started some wrestling matches at the rear of the bus; while the older girls roused themselves in an effort to keep the others occupied. They danced, jumped up and down, and did gymnastics; but despite this exercise they were growing colder every minute, and when during some roughhouse, a small boy's elbow went through a pane of glass, a cry of dismay arose from one and all.

It was then that Tom Osgood had an inspiration. Stored under the back seat and carried for just such emergencies, were canned food and a small, portable stove.

"I'll say we were pretty dumb not to think of 'em before," he observed disgustedly, "but we've never had a chance to use 'em, and I guess every one forgot." He had been rummaging about on his hands and knees, and now stood up, a bewildered expression on his manly little face. "Why they're not here! Not anywhere! We've always carried 'em, and extra blankets too. Say! I bet I know what happened. Joe took 'em out when he cleaned the bus this morning, and forgot to put 'em back when he had that pain. He always sets 'em in the harness closet out o' the dust; and maybe Clem s'posed they was right here, or p'raps he didn't know they'd ought to be here. Gee! I'm hungry, and some o' that canned soup would have tasted good."

There followed another fruitless search, the children watching with strained, unchildlike faces.

"Don't cry, kiddie," said Jack, as a small girl burst into frightened tears. "I'm going to make a stove out of this milk can. We'll soon be opening windows to cool off!"

Nancy forced a smile at her brother's attempt at cheer, and lifting the crying child onto her lap, wrapped her coat about the small, cold legs. The bus was shaking with each gust of wind, and though every window was thick with frost, she knew the storm had increased in fury.

(To Be Continued)

One Business Booming

Firm In England Swamped With Orders For Jews' Harps

"Industrial Britain" informs us that Birmingham, the only city in the world where Jews harps are manufactured, is experiencing such a boom in this respect that prospective players all over the world, especially in America, are obliged to await delivery. The delay is due to a lack of skilled tongue setters, who have to be trained for several years before they are proficient. The setters are responsible for the adjustment of the metal strip that vibrates to produce the sound, and if this strip is the merest fraction of an inch out of adjustment the tone of the harp is ruined. One firm in Birmingham is producing 100,000 harps a week, and has enough orders in hand to keep the factory busy for three months. The head of this firm has just returned from a business trip in the United States, where Jews' harp bands are popular, with one order for nearly 150,000 instruments. —Brockville Recorder and Times.

Would Join British Empire

You have heard of districts in Europe inhabited by Germans who want to join Germany. There is also one country in Europe where people want to join Britain, though they are not British. In five years Iceland will reconsider her present association with Denmark. A large and increasing element wants to seek admittance to the British Empire. It will not happen, of course. But how significant that it should be suggested. —London Sunday Express.

Copenhagen is to have an office building with outer walls almost entirely of glass. 2117

A Rare Instrument

Mathematical Rod Invented In The Year 1617

One sees queer things in the advertisement columns of the London newspapers as being for sale. Some of these are simple, some are mystifying. In the later category most people placed an item which appeared the other day. The advertiser announced that he wanted to sell a set of "Napier's Bones."

No doubt to the mind's eye of the majority of folk who read it there appeared a vision of a wired skeleton such as anatomical museums and medical textbooks show. Or the remains of some famous Napier or other which had been preserved something like those of Jeremy Bentham, now in a great London hospital. But only the mathematicians (and not all of them) might be expected to know anything of Napier and his bones.

The bones are a set of small rods inscribed with figures. By means of these things multiplication, division and all sorts of mathematical gymnastics may be performed by the initiate. The method of using them was invented, and explained in a treatise, by John Napier, of Edinburgh, in the year 1617, and they came to be known as "Napier's Bones."

Very few sets are known to be in existence.—Vancouver Province.

International Tourist Bureau

Plan To Link Up Two Provinces And Two States

A proposal to link sections of two provinces and two states into an organization publicizing tourist attractions of the areas was made by G. F. C. Pousette, head of the Winnipeg Tourist and Convention Bureau.

Following Pousette's suggestions before a meeting of civic envoys at Detroit Lakes, Minn., a committee was appointed to investigate the plan that would organize northwestern Ontario, Manitoba, eastern North Dakota and northern Minnesota.

The territory would be designated as the "circle tour" and would extend from Winnipeg to Kenora, Ont., to Fort Frances, Ont., through north-eastern Minnesota to Detroit Lakes, Alexandria, the Twin Cities, Fargo, N.D., and then north to Grand Forks, Crookston, and back to Winnipeg.

Enjoy It Anyway

When shoe repairers hold a picnic they usually enter into their merriment with a will their heart and sole. —Kitchener Record.

And they enjoy themselves if they are on their uppers. —Chatham News.

And as long as it lasts.—Montreal Star.

But if anybody asks if they had a good time they reply, "Oh, just sew sew." They never wax enthusiastic. —London Advertiser.

Some Queer Laws

New York's statute books contain many don'ts. Among these are statutes prohibiting riding a bicycle with hands off the handlebars, flying kites in city streets, and firing a cannon in the city except with the mayor's permission, the cannon to be no larger than a four-pounder.

Formosa's recent earthquake was the most disastrous since the quake of 1906 which cost nearly 1,500 lives.

Little Helps For This Week

And when ye stand praying, forgive if ye have aught against any, that your Father which is in heaven may forgive you your trespasses. But if ye do not forgive, neither will your Father which is in heaven forgive your trespasses. Mark 11:25-26.

"Tis not enough to mourn your sins,
"Tis but one step to heaven;
When you are kind to others—
then
You know yourself forgiven.

There is nothing to do with your fellow men but to love them, to contemplate their virtues with admiration, their faults with pity and forbearance, and their injuries with forgiveness. To hate your adversary will not help you; nothing within the compass of the universe will help you, but to love him. How many a solitary place would be made glad if love were there, how many a dark dwelling would be full of light.

Viewpoint Of Youth

Ontario Boys Suggested Relief Board Might Purchase Rugby Balls

The rugby season is with us. In a recent week some boys at an Ontario high school wanted to practise the great autumn sport. Last year's rugby balls had disappeared. The school board had decided to retrench and not purchase any new ones out of public funds. Some new ones were being provided out of the students' own athletic funds but they were not available.

What happened? A group of boys approached the athletic teacher to ask if a ball or two might not be secured from relief funds.

The rest of this column could doubtless be filled amplifying this little sidelight on a young Canadian viewpoint about the Dominion's biggest single business. Suffice to reflect how deeply its roots are sinking, when fifteen-year-old Canadian lads think relief rolls are synonymous with rugby balls.—Financial Post.

World Speed Record

Record For Land Plane Of 347 Miles Per Hour

W. H. Hitchman, of the National Aeronautics Association, announced that the Federation of Aeronautique Internationale in Paris, will be asked to credit Howard Hughes, wealthy film producer, with a world speed record for land planes of 347 miles an hour.

This speed was attained by Hughes in a series of tests near Santa Ana, Calif., in his 14-cylinder, 1,000 horsepower monoplane.

The present record of 314.319 miles an hour was set by Raymond Delmotte, of France, in 1934.

The population of the world has been estimated at two billions by the Statistical Institute of the League of Nations.

Mountain sheep are almost extinct in Washington and Oregon now.

J. Olsen had the misfortune to cut his hand, while splitting wood last Saturday.

H. Herlihy was absent from his teaching duties at the high school last week, through illness. Mrs. H. McDonald substituted during his absence.

Harold Martin has left the hospital, after being confined there for over two months as the result of an accidental fall, in which he sustained a broken pelvis.

Mr. and Mrs. P. Gauthier of Englewood visited at the home of Mr. and Mrs. E. Marion last week.

Mrs. M. Avery and Mrs. E. J. Crathern entertained last Thursday at a miscellaneous shower at the home of the latter, in honor of Miss Nellie Pernoski. Mrs. J. Ross and Mrs. E. J. Crathern presided at the tea table, while servitors were Misses Christine Rowles, Celina Rowles and Kay Manders. The numerous gifts were wheeled in to the bride-elect by Iris and Effie Roberts, in a prettily-decorated buggy.

Jack Paton has purchased a new car.

The attendance at the soccer meeting last Wednesday was very small, and no further plans were made for the season.

B. Porritt, former manager of the Abbotsford branch of the Canadian Bank of Commerce, visited friends here last week. Mr. Porritt is stationed with the down-town branch of the bank in Vancouver.

R. H. Eby, former Customs officer here and Board of Trade secretary, is relieving at the C.P.R. depot during M. Shore's vacation.

Dr. R. A. Trethewey drove to Ashcroft this week for a few days of bird snooting.

Election day was very quiet in Abbotsford, but a crowd arrived at night to hear the results.

Daniel Smith is working at the Webb Tire Shop.

While backing around on a loading platform, opposite Zalesky's blacksmith shop on Saturday, a truck loaded with logs overturned. W. Marion, who was driving it, received cuts and bruises.

At a meeting of the Fraser Valley Union Library officials, held in Mission last week, it was decided that the headquarters of the library will be permanently established in Abbotsford.

Mr. and Mrs. R. Amos have taken up residence in Mrs. Haddrell's premises at the east end of town. Mr. Amos is Overwaitea manager here.

Preliminary plans for a Klondike Night Jamboree, to be held in Abbotsford on November 20 were made at a meeting of a B.P.O.E. committee, comprising A. Price, G. H. Heller and G. Geary last week. Because of the efforts entailed, the event was not held last year, but encouraged by the past popularity of it, a lively program is in preparation for next month, a program that will be symbolical of gold-rush days, with lots of amusements. It will, it is hoped again provide a substantial Christmas Cheer fund.

Scores of absentee voters were conveyed back to Abbotsford on Monday in politicians' cars, and returned to their homes in New Westminster, Vancouver and other places after they had voted.

A Good Job

GOOD WORK at a reasonable price is CHEAPER than poor work at ANY PRICE.

CAREFUL, CAPABLE WORK is the ONLY KIND I DO.

TWENTY YEARS ASLEEP, 1914-34

On August fourth our conscience went to sleep. And Death throughout our land did reap. Our Youth so brave, 'Twas not for them to question why they came They threw their tender bodies in the flame. We tend their graves. We tend their graves and build them monuments. And time will soften family rents, Is that enough? Or summon conscience out of its deep sleep To find the wolves who slaughtered our young sheep. And treat them rough. As leaders' conscience speaks through press and book. We note the Truths (?) where'er we look. Were mostly lies; Will conscience sleep while darker war clouds grow— Or open eyes?

EFFORTS TO GOD

With sudden gasps for air the soldier's hands—blind—gassed— it's all the same. Each soldier proud that he had held the torch For you— Democracy— How brave they died! HOW LEADERS LIED! O God, how hard it must have been for Youth. At first, to tell these spirits brave and true, HOW LEADERS LIED! But shattered bodies as the years rolled by, Caught glimpses now and then before they died. HOW LEADERS LIED! W.M., Abbotsford

Mr. D. Willan was absent from his hardware store last week with illness.

DEFENDS FORMER ABBOTSFORD MINISTER

"Rev. Edwin C. Baker, C.C.F. candidate for the New Westminster riding, has probably been given a boost instead of a knock by the cheap and malicious attack made upon him by the Vancouver Sun reporter.

The Sun is again living up to its reputation as a scandal monger a mud slinger and a trifle with the truth when it stands for such reports as that published in its issue of October 4. It must be that the Liberals are indeed afraid of Mr. Baker's chances over Mr. Tom Reid when it resorts to such cheap recourse. (The Sun and Columbia both attacked the former Abbotsford clergyman for his service at the funeral of a Mr. Roebuck at which pallbearers wore red bands upon their arms and the coffin was draped with a red flag).

Rev. Baker has been an Anglican clergyman. Consecrating his life to the betterment of humanity he entered the ministry to that end. Finding himself cramped by the restrictions of the ungodly present-day system under which all humanity is forced to live, he withdrew from active participation in pulp work and has been devoting his life to the establishment of a Christian social order.

Earning a precarious living for himself and family by chicken ranching, Mr. Baker has forsaken a comfortable and uncertain means of livelihood for a laborious and uncertain one...

One minister from New Westminster who devoted time and energy to the provincial campaign on behalf of the C.C.F., stated that he had come to the conclusion that it was practically useless to ask men and women to adopt Christianity while their stomachs were empty, while they had no fires in their homes, while the children were going undernourished and their young people had no hope or prospects for the future.

Rev. Baker has reached the same conclusion. A little bit of heaven brought to earth would be far more in line with the Master's teaching than a heaven attained only by dying.

Rev. Baker will have the support of the women in this election. Those who are concerned about the future of their children, those who are harassed and distressed to provide food and raiment for them now, and those who look with fear into the future for their own fate will give Mr. Baker their undivided support to send him to help fight for a new, more Christian system.

In entering the political field, Rev. Baker is practicing Christianity in the fullest sense of the word—Marpole-Richmond Review.

Mr. Baker almost captured Tom Reid's seat in the election, the vote being: Reid, 9,898; Baker 9,617.

More Mileage Means Money To You!

Every car-owner wants to get the maximum mileage to the gallon of gas, yet every day we see cars chugging along, without any power or pep, and consuming, probably, half as much gas again as they ought to. There are several reasons why your gas bill is high—and your mileage is low. Bring your car in and let us check it over—sometimes it is just a minor adjustment that is the trouble. Delay means more expense. Bring it in today!

SUMAS DISTRICT

Constable Wing of New Westminster is patrolling Sumas municipality while Constable Gauld is upon his vacation.

Chas. Baynes attended to clerical work at the municipal hall last week while Clerk McPhail made a trip to the Okanagan.

Peter McLean, 12, of Huntingdon, shot himself through the left hand on Monday with a .22 rifle, the bullet lacerating his thumb and forefinger.

Shipments of hops are now being made to the East and to Vancouver from the Canadian Hop Co. gardens at Sumas.

Miss Virginia DeLair has taken a position as book-keeper at the Abbotsford Motors garage.

Collin Blacklock plans erection of a large implement shed.

Mr. and Mrs. Cyrus C. Gardner of Stratton announce the marriage in Mission Baptist Church, Whatcom rd. on November 6 at 3 p.m. of their youngest daughter, Dorothy Ella, to Mr. David Ralph Mander, son of Mrs. Holbrook, Clayburn.

Milton Nelles is placing a basement under his house.

Born.—To Mr. and Mrs. George Cox, Kilgord, on Oct. 10 in the local hospital, a son.

Members of Sumas Co-Operative entertained at a jolly dance in Whatcom road hall on Friday night, when a crowd estimated to number 300 enjoyed a pleasant evening.

Sunflower, 24-inches in diameter, with stalk 12 feet in length, was cut down at P. Reimer's farm, Whatcom road, last week. Largest sunflower shown at Vancouver exhibition was said to be 22 inches diameter.

Mrs. H. N. Ord returned from Pasadena last week, where she visited her mother, and left her two young sons to attend school.

Shotgun barrages were heard even in Abbotsford on Sunday, when the Washington state upland bird season opened. Some satisfactory bags of pheasants were brought into the border town of Sumas on Sunday, but very few quail and Hungarian partridge were seen. Washington game board is "jumping" the dates this year, making open days, Oct. 13, 16, 19, 20, 23, 30, Nov. 2, 3 and 6.

pital, a daughter.

The Next War...When?

"Not this week, nor this month; you have this year to do what you like. Not next August, nor next September; that is still too soon; they are still too prosperous from the way things pick up when armament factories start at near capacity; they never fight as long as money can be made without. So you can fish that summer and shoot that fall or do whatever you do, go home at night, sleep with your wife, go to the ball game, make a bet, take a drink when you want to, or enjoy whatever liberties are left for anyone who has a dollar or a dime. But the year after that or the year after that they fight. Then what happens to you?"

First you make a lot of money; maybe. There is a chance now that you may make nothing; that it will be the government that makes it all. That is what, in the last analysis, taking the profits out of war means. If you are on relief you will be drafted into this great profitless work and you will be a slave from that day.

If there is a general European war we will be brought in if propaganda (think of how the radio will be used for this), greed, and the desire to increase the impaired health of the state causing us. Every man that is made now to deprive the people of their decision on all matters through their elected representatives and to delegate those powers to the executive brings us that much nearer war.

"No Honesty Between Nations"

It removes the only possible check. No one man nor group of men incapable of fighting or exempt from fighting should in any way be given the power, not matter how gradually it is given them, to put this country or any country into war.

The first panacea for a mismanaged nation is inflation of the currency, the second is war. Both bring a temporary prosperity; both bring a permanent ruin. But both are the refuge of political and economical opportunists.

No European country is our friend nor has been since the last war and no country but one's own is worth fighting for. Never again should this country be put into a European war through mistaken idealism, through propaganda, through the desire to along our borders, or through the wish of anyone through war, notoriously the health of the state, to make a going concern out of a mismanaged one.

Now let us examine the present set-up and see what chance there is of avoiding war.

No nations, anymore, pay their debts. There is no longer even a pretense of honesty between nations or of the nation toward the individual. Finland pays us still; but she is a new country and will learn better. We were a new country once and learned better. Now when a country does not pay its debts you cannot take its word on anything. So we may discard any treaties or declarations by any countries which do not coincide completely and entirely with the immediate and most cynical national aims of those countries.

Italy a Country of Patriots

A few years ago in the late summer, Italy and France mobilized along their border to fight over Italy's desire for colonial expansion in North Africa. All references to this mobilization were censored out of cables and radiograms. Correspondents who mentioned it in mailed stories were threatened with expulsion. That difference has now been settled by Mussolini's shift of ambition to East Africa where he has obviously made a deal with the French to abandon his North African plans in return for France allowing him to make war on a free sovereign state under the protection of membership in the League of Nations.

Italy is a country of patriots and whenever things are going badly at home, business bad, oppression and taxes too great, Mussolini has only to rattle the saber against a foreign country to make his patriots forget their dissatisfaction at home in their flaming zeal to be at the throats of the enemy...

France is glad to see him fight. In the first place anyone who fights may be beaten; Italy's Black Caporetto, her second greatest military debacle, was administered by these same Ethiopians at Adowa when fourteen thousand Italian troops were killed or driven from the field by a force which Mussolini now describes at 100,000 Ethiopians. Certainly it is unfair to ask fourteen thousand troops to fight one hundred thousand but the essence of war is not to count your force of fourteen thousand with a hundred thousand of anything. Actually the Italians lost more than 4500 white and 2000 native troops, killed and wounded. Sixteen hundred Italians were taken prisoners. The Abyssinians admitted losing 3000 men. Anyone who fights near the equator can be beaten by the mere difficulty of keeping an army in the field.

Then France feels that if Italy wins or loses, the war will cost her so much that she will be in no position to make trouble in Europe. Italy has never been a serious problem unless she has allies, because she has no coal and no iron. No nation can make war without coal and iron. Lately Italy has tried to overcome this by building up an enormous air force and it

The World In Danger

As week succeeds week the possibilities of war between Italy and Ethiopia grow nearer to certitude and the situation becomes fraught with alarming menace, not merely to the two countries involved but to other countries and possibly the whole civilized world.

With the Italian representatives rejecting, one after another, proposals which are being made almost daily by committees of the League of Nations and interested powers in the hope of averting an outbreak of hostilities, and Emperor Haile Sellassie refusing to accept any compromise which would result in the surrender of the independence of his kingdom, the situation becomes more and more gloomy, and the gloom deepens with the active preparations which are being prosecuted by Mussolini and the belligerence with which he is whipping his countrymen into a warlike attitude.

Statements of the leading nations of the world and international authorities appear to be in complete accord with the general consensus of world opinion that such a conflict would not be confined to Italy and Ethiopia, but that other nations would be dragged into the fray and that it is even likely to lead to a general conflagration which would result in misery and suffering to millions and loss of life and property on an even greater scale than the Great War of 1914-18.

Indeed, there are authorities who see in the present situation a potential destruction of civilization itself. This view is supported by the Committee on International Law of the Canadian Bar Association, which in a report to the Canadian Bar Association convention in Winnipeg recently spoke of "the consequences to the world and Canada of an actual resort to arms" as probably "catastrophic in the sense that it may include the destruction or profound modification of many of the institutions upon which civilization is based."

Again in the same report, the committee dealt with the conduct of Italy as indicating that government's unwillingness to accept decisions of the Council of the League of Nations, of which she is a member, in the following words:

"If that attitude persists the world may be faced with a complete breakdown of the system of public international order which was supposed to have been permanently established by the sacrifices of the years 1914 to 1918.

"The question is whether or not the peoples of the world will permit this by failure to agree on united action or whether, by united action, they will, as they undoubtedly can, insist upon the observance of the public law upon which the continuance of our present civilization may depend."

The statement that the peoples of the world can avoid this catastrophe by united action refers to the powers which the member countries of the League vested in themselves when they approved Article 16 of the covenants, to which all members have subscribed, agreeing to impose financial and economic sanctions as a punitive measure against any member who breaks the covenants and commits an act of aggression against any other country.

In view of the menace of the situation the importance of these powers become paramount. They are contained in the first and third paragraphs of Article 16 and read as follows:

"1. Should any Member of the League resort to war in disregard of its covenants under Articles 12, 13 and 15, it shall, ipso facto, be deemed to have committed an act of war against all other members of the League, which hereby undertake immediately to subject it to the severance of all trade relations, the prohibition of all intercourse between their nationals and nationals of the covenant-breaking State, and the prevention of all financial, commercial or personal intercourse between the nationals of the covenant-breaking State and the nationals of any other State, whether a Member of the League or not."

"3. The Members of the League agree, further, that they will mutually support one another in the financial and economic measures which are taken under this Article, in order to minimize the loss and inconvenience resulting from the above measures, and that they will mutually support one another in resisting any special measures aimed at one of their number by the covenant-breaking State, and that they will take the necessary steps to afford passage through territory to the forces of any Members of the League which are co-operating to protect the covenants of the League."

It is not perhaps generally known that the onus of deciding whether an act of aggression or incident is to be construed as "an act of war" within the meaning of the covenants is left with each individual member to decide. A clause was drafted some years ago vesting the decision with the Council but this has never been ratified by the League.

However, once a member has decided that some act or incident is an "act of war" it has no alternative, under the covenants, but to proceed with the measures outlined in Article 16. Otherwise, that country has itself violated the covenants.

With the onus of interpretation of an "act of war" left upon each individual member, the importance of the general public being fully posted on events as they transpire, can readily be understood, as in the final analysis, it is the people of each country involved who are in the position by their influence, to decide what part their country shall play in the efforts to avert a major catastrophe.

Huge Boulder Slide

500 Tons Of Rock Breaks Loose At Niagara Falls

With an thundering roar, 500 tons of rock broke loose from the cliff on the American side below the lower bridge at Niagara Falls, at a point where 200 tons fell last fall.

Huge boulders and shale were piled high on the tracks of the International Railway gorge line, and traffic was suspended. The railway tracks were lifted from the roadbed and pushed to the brink of the gorge. One pole carrying power lines was moved by the avalanche of rock and sand.

Officials stated it would take considerable time to clear the railway track of the present fall.

Caked Udder Cleared

Experienced dairymen find Minard's particularly good for treating caked udder, lumps, bruises, etc. Keep bottles in stable and house.

Completes Bird Survey

Northwest Territories Good Breeding Place States U.S. Biologist

Completing a two-month survey of nesting places of migratory waterfowl in the Northwest Territories and northern Alberta, L. J. Goldman and C. E. Gillham of the United States biological survey, Washington, D.C., arrived at Edmonton by aeroplane from Fort Resolution.

Mr. Gillham, who lives at Albuquerque, N.M., expressed himself as very favorably impressed with the extent and possibilities of the north country as a breeding area for waterfowl, but explained he was unable to release the result of his survey until he had reported to his government.

Nesting places of duck and geese on the various lakes as far north as Fort Resolution were surveyed.

Women Like Combines

We'll wager the farmers' wives are glad that threshing is over. At the Jess Denton farm in Alma, Kansas, there were 31 men for dinner and 27 for supper, while at another farm near, where one of the big combines was used, three men harvested 165 acres in a day. That is one place where the machine lessens the work for the women.

A Great Astronomer

Dr. Anna Cannon Has Classified Over 400,000 Stars

That astronomy is not so exact a science that the average man would not be interested were information readily available, is the opinion of Dr. Anna J. Cannon, of Harvard, who was in Toronto as a delegate to the American Astronomical Society's convention.

For 50 years Dr. Cannon has been gazing through telescopes and the mystery of the heavens has as great a thrill for her as ever. Dr. Cannon is the most famous woman astronomer in the world, and she has shared with Madame Curie of France and others equally famous the honor of receiving the Ellet Richards' prize for outstanding work by women in research.

She was the last recipient of the prize, which was founded to encourage women to study science. But because it was felt women no longer needed encouragement to enter, it was discontinued. Dr. Cannon has continued it, however, for women in astronomy. It is called after her now and it goes to women astronomers.

The prize was given Dr. Cannon for classification of stars according to their spectra. She has classified over 400,000. Harvard is now a mecca for astronomers all over the world who seek astronomical observations of spectra.

An Intricate Problem

Joining Of Steel Plates On Liner Queen Mary Requires Study

Construction of the new Cunard White Star super liner Queen Mary has been complicated by reason of the fact that no two of her steel plates are exactly the same, according to reports from the shipyard at Clydebank. Most of the plates are curved, and many of them are more than 36 feet long, 6 feet wide and more than an inch thick. Few are really flat.

The joining of the plate so that each rivet hole pairs exactly with the corresponding hole is an intricate problem, and more than 10,000,000 such pairs of holes must be made. Each plate must overlap at least six others adjoining it, creating a problem of arrangement that has required the study of a large engineering staff.

A large half-model of the ship has been laid out on a loft floor at the shipyard, furnishing an accurate picture of the successive rows of plates and a laboratory for the study of the details of construction which are carried out on a larger scale on the ship itself.—New York Times.

Greatest Russian Scientist

Has Done Much To Extend Study Of Nervous System

Both Tsarist and Bolshevik Governments have delighted to honor the great Russian scientist, Prof. Ivan Pavlov, says the News of the World. No one living has done more to extend the study of the nervous system of men and animals, and particularly knowledge of the connection between brain and digestion. He was awarded the Nobel Prize for this work as long ago as 1904. Last year, when he was 85, the Soviet Government spent £10,000 on equipping a laboratory for him. It now pays the old man, who was the son of a poor village priest, £2,000 a year, and, according to H. G. Wells, he is the only man who dare answer Stalin back.

New Variety Of Dahlia

A Siamese-twin dahlia, which may be the forerunner of a new variety of this autumn flower, was displayed at Victoria recently. The freak bloom was grown by Mrs. W. G. Gordon of Sooke, B.C. It is two flowers joined together at the calyx. The dahlia is of the pompom variety and the back-to-back flowers almost form a solid ball of pink petals. Plant experts termed it a queer aberration of nature.

Village Needs Pied Piper

Fifty rats a night are being killed in the village of Chiltorne, England. All the men have enlisted into an anti-rat army to combat the ravages of the rodents, which have laid siege to one farm and have become a plague. So far the rats have won.

To help teach children music a resident of Portland, Ore., has invented a metal plate painted with a staff to which magnet backed paper notes can be fastened.

Gas Test Well

Great Activity Shown In Hudson Bay Junction Territory

Amalgamated Oils Ltd. brought in the fourth gas test well on the Kakwa structure recently. The flow was encountered at 275 feet, the same level at which gas was found in other wells, says a report from Hudson Bay Junction.

The four holes have been drilled largely with a view to securing geological data on the structure, which is very large. A test for oil somewhere in the Pievie hills is now considered justified.

It was stated unofficially that the Senator Oil and Gas Development Company, Ottawa, intended shipping a rig to Hudson Bay Junction and drilling for oil on the structure where the Trail Blazer Company put down a hole last year. This structure is near Hudson Bay Junction and quite distinct from the Kakwa structure, 25 miles distant.

Rare Animal From Africa

Okapi In London Zoo Looks Like Miniature Giraffe

Leo, the Okapi, one of the rarest animals in the world, has taken a prominent place in London Zoo Society.

Leo comes from Africa and is the talk of the town. An Okapi (O-kapi, with the accent on the second syllable), includes in equal proportions the characteristics of the giraffe, the deer and the zebra. He looks like a miniature giraffe.

One of the shyest of animals, the Okapi has been hunted almost to the point of extinction by the pigmies of the Luri forest with their deadly blow-guns.

Hurts Coal Industry

Bitter Complaint Against Natural Gas Competition In Alberta

Use of natural gas in Edmonton last year deprived mines of a market for 350,000 tons of coal, Sir Montague Barlow, eminent British authority on collieries, was told as he opened his investigation of Alberta's coal industry. Bitter complaint against natural gas competition was voiced by Mayne Reid, counsel for 10 coal companies. Mr. Reid also informed Sir Montague that truck and bus competition to railways has reduced the market for steam coal.

FASHION FANCIES

LITTLE DAUGHTER FOLLOWS "SUIT" BECAUSE MUMMY HAS DECIDED IT'S A SUIT SEASON

By Ellen Worth

Here she is showing just how attractive and practical her new model can be.

Originally it was carried out in lightweight woolen in red and brown mixture. The boxy jacket was plain brown wool. The jacket has enough warmth for fall days. And another nice thing about it is that it gives extra warmth for winter days.

Wool jersey dress with the jacket of velveteen is another attractive scheme. Style No. 675 is designed for sizes 8, 10, 12 and 14 years. Size 8 requires 2 1/2 yards of 39-inch material with 1 yard of 5 1/2-inch ribbon for dress and 1 1/2 yards of 39-inch material for jacket.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Let the new Fall and Winter Fashion Magazine assist you in assembling your family's fall clothes. There are designs for every type and every occasion. And of course one of our perfect-fitting patterns is obtainable for every design illustrated. Don't delay! Send for your copy to-day!

Sounds Like Good Scheme

Husbands Left Alone During Holiday Will Be Looked After

A scheme is being mooted in Old London to meet the needs of that unfortunate section of humanity—the husbands whose better halves have gone on ahead on their holidays, or who are staying another fortnight longer. Most husbands have this experience now and again. They fix up meals somehow, make the bed just before friend wife comes back, and use up all the socks in the drawer pending her return to darn them.

The idea is that a catering firm will provide breakfast and evening dinner, put it in the refrigerator overnight, charging so much a week for the service. Hubby just leaves a note suggesting what he would like and the thing is done. Thermos containers will keep the food warm. And what's more the company will do the dish washing.

Another branch of the service is valeting. Socks are to be left in a bag, collected, and returned next day, washed and mended.

Perhaps wifery may not like this idea. One of the greatest satisfactions she gets out of her holiday is the thought that hubby is putting up with so much discomfort that he will realize how much he depends upon her and will appreciate her all the more when she comes back.—St. Thomas Times-Journal.

Land Has Disappeared

No Trace Can Be Found Of Property In Esquimalt

H. Seller of San Francisco was surprised recently to find a lot on which he had been paying taxes for over 50 years had disappeared.

Seller went to Victoria, B.C., to secure a title of a piece of property in Esquimalt, left to him by his father. He visited the land registry office and real estate operators both there and in Esquimalt, but could find no trace of the property.

His father came to the coast about 60 years ago, and, becoming interested in Victoria real estate, purchased the land which he left to his son on his death. The son was advised to hold the property as a drydock was to be built at Esquimalt which would increase its value. He let the land go at a tax sale and bought it back again.

The only explanation he can give now is that the property must be under water. It is said the matter was settled by the payment by the municipality of the amount paid for the land by Sellers at the tax sale.

Huge Cliff Demolished

Blasting In Scotland Dislodges Million Tons Of Granite

One of the greatest blasting operations in Scotland was successful recently when a granite cliff 500 feet high and stretching 400 feet across the face of Ben Dhurnich, near Bonawe, was "demolished" by gunpowder. A signal was flagged from a tiny island in Loch Etive. At this a man crouching on the mainland, under a protective rock ledge in a forest 500 yards away, pushed down the lever of a dynamo, and the cliff tumbled into a myriad fragments. Powder fumes and granite dust rose in a cloud 2,000 feet high. In that second there was crowning triumph for men who had planned for the last four years to destroy the cliff, and by the touch of a lever there had been gained for industry 1,000,000 tons of granite. The success of the blasting, which cost \$20,000 to carry out, means that 400 quarrymen will be given work for six years.

Plenty Left

The play had reached its climax. There were tears in the eyes of the audience, for the villain had just kidnapped the heroine. The hero then came on the stage to find his sweetheart gone. Clutching hold of the table with trembling hands he cried out loudly: "She is gone! She is gone! What is left for me?"

Somewhere in "the gods" the shrill voice of the new sales boy cried: "Peanuts, chewing-gum, chocolate and ice-cream!"

Bird Was Artistic

At Egginton Rectory, Derbyshire, a small stream flows through the garden; on the bank among the reeds and irises a moorhen built her nest; morning after morning the edge of this was carefully decorated with sprays of buttercups gathered from the adjoining meadow.

Spectators Were Scared

An artist's zeal brought a police car and ambulance and halted work in a Boston office building. Perched high on a roof, painting a skyscraper view of the waterfront, the young artist did not know that office workers called police to halt his "suicide"

Now's the Day and Now's the Hour

With times improving, roll-your-owners "wha hae" smoked Ogden's Fine Cut in the past are crowding back to Ogden's because of the satisfying cigarettes it assures. And they are learning again that the best really costs very little. "Now's the day and now's the hour" for you, too, to get back to this favourite cigarette tobacco. And remember—"Chantecler" or "Vogue" are mighty fine papers.

52 Poker Hands, any numbers, now accepted as a complete set.

OGDEN'S FINE CUT

Your Pipe Knows Ogden's Cut Plug

Dropped From The Sky

Massed Landing Of Troops Practiced In Military Manoeuvres

Soviet military strategists dropped an army from the sky recently as they practiced their latest war manoeuvres—mass landing of fully-equipped troops with parachutes. Bearing rifles and sub-machine guns, the jumpers landed behind "enemy" lines, formed ranks quickly and bore down upon an opposing airdrome.

Whole regiments, landing from the skies, succeeded in capturing the airdrome, but later came to theoretical grief. When they used the airdrome as a base from which to advance overland to attack the main "enemy" forces from the rear, they were met by a quickly mobilized defence force which, with the aid of tanks and armored trains, "annihilated" them.

Advice For Everyone

Doctor Says People With Colds Should Be Isolated

If you have a cold, go home and isolate yourself. This is the advice of Dr. Gordon P. Jackson, M.O.H., of Toronto, who remarks that people do not consider colds with sufficient seriousness. The common cold, he points out, is responsible for greater financial loss to business than any other single disease.

"The common cold is highly communicable," he says. "And the change from the nice weather to the cold nights we now have, lowers the average individual's resistance."

10c WHY PAY MORE Best of all fly killers. Clean, quick, sure, cheap. Ask your Druggist, Grocer or General Store. THE WILSON FLY PAD CO., HAMILTON, ONT.

Great Progress Made In Agricultural Development In The Prairie Provinces

Great progress in agricultural development has been witnessed in the Prairie Provinces of Canada during the last 35 years. During the years 1901 to 1931 the area of occupied farm land in the prairie region increased from 15 million acres to 110 million acres, or more than seven-fold. In 1901 the Prairie Provinces contained 24.3 per cent. of the total occupied farm acreage in the Dominion and by 1931 this acreage had increased to 67.3 per cent. of the total. In the same period the improved farm acreage increased from 18.5 per cent. to 69.8 per cent. and the field crop acreage from 18.2 per cent. to 69.1 per cent. The decade 1901 to 1911 witnessed the greatest expansion, due to the rush of homesteaders into Saskatchewan and Alberta. Occupied farm land increased from 15 million acres to over 57 million acres. Of the improved land in the Prairie Provinces in 1931, 67 per cent. was in field crops.

Farming in the Prairie Provinces comprises four more-or-less distinct types—wheat growing, mixed farming, dairying (usually associated with mixed farming), and ranching. Wheat growing predominates in southwestern and central Alberta, throughout the whole of Saskatchewan except the northern and eastern fringe and the dry belt, and in southern Manitoba, although in the latter area, the proportion of other cereals and forage crops is growing rapidly. Mixed farming is found in northern and western Alberta and in the northern and eastern parts of both Saskatchewan and Manitoba—in other words over practically the whole of the park belt. Mixed farming is also the dominant type in the irrigated districts. The greatest development in dairying has occurred in eastern Manitoba, northeastern Saskatchewan and northwestern Alberta. Ranching is practically confined to the dry area in southwestern Saskatchewan and southeastern Alberta and to a strip of land extending from the international boundary northward along the foothills to beyond Calgary.

The Press Predominates

News Released Over Radio Only Given In Briefest Form

Winged-words carried on the current of electrical impulse and destined for the ear of the world flash out from Daventry, England, from Radio City, New York, or from a local radio station, giving to you the "news of the world."

News of the world, but strangely enough, nought but a question-provoking what, when, and where is radio permitted to release to the listener-in. Every newscast given voice over the air is released in briefest form by news-gathering agencies with contact maintained with remotest reaches of the world as well as with the great metropolitan centres. Radio, in respect to news would be inarticulate save for the courtesy of the press. Powerless to capitalize on any news presentation and without the presses world-wide contact with the very pulsebeat of the world, radio could but parrot the news of yesterday. Punctuating every statement made by radio with regard to news is a question—a puzzling lack of the definite. Turn then to your newspaper, truly giving to you the news of the world.—Fort Erie Times-Review.

Watch Keeps Good Time

Present Owner Claims It Is 253 Years Old

An ancient watch is owned by Mr. Clement Toovey, a 79-year-old baker of Whilden Street, Amersham. He uses a watch that is 253 years old. It is believed to be the only one of its kind in the world. It is solid gold, and is only slightly larger in circumference than a half-crown. The watch originally belonged to his great-great-grandfather, and has been handed down from one member of the family to the other. Mr. Toovey has used it regularly for 45 years, during which time he has only spent 2d on it when a hand worked loose.

More than 5,000 applications from farmers in the Prairie Provinces had been received up to August 17, 1935, by the Water Development Committee, for assistance under the Prairie Farm Rehabilitation Act. The headquarters of the committee are in Swift Current, Sask.

The Society Islands of the South Seas now have a phonograph record censor.

Peace For Sleepers

Movement To Do Away With Noise From Auto Horns

Sleepers are getting some "breaks." For the movement to hush auto horns is spreading on a world-wide basis. Rome, Paris, Berlin, London, Florence, Naples are among European cities that have taken steps to dampen the ardor of auto horn tooters. In Madrid a bull may bellow at his heart's content, but so much as a "peep-peep" from a motorist may mean trouble.

New York is in the midst of an anti-noise drive. Chicago authorities swung into action under a new Illinois law which gives policemen the right to judge whether a motorist is making an undue disturbance.

The Toronto board of control has prohibited auto horn honking between 11 p.m. and 7 a.m.

Ottawa civic officials countered Toronto's claim to be the first Canadian city warring on auto-honking law by digging into its archives and finding it had an edict to hush noisy motorists before there were any.

City Clerk Norman Lett discovered a 45-year-old bylaw forbidding anyone at night to "blow any horn, toot and whistle, shout in the public streets or otherwise make noises calculated to disturb inhabitants."

Had Many Defenders

Charm Of Garibaldi Made Him Hero Of Italy

Many are the stories told of the courage and charm of Garibaldi, Italy's hero. On one occasion, when the King was exerting every effort to have him captured, he left Italy, going across the border into France. Sitting alone in an inn one night, he was recognized by one of the patrons, who informed his companions of his identity and also of the fact that there was a heavy price on his head. The men, more than a score in number, surrounded Garibaldi and announced their intention to return him to Italy. If they had expected Garibaldi to appeal to them for mercy they must have been disappointed. He genially suggested that they sit down and partake of his hospitality before calling the soldiers. This they willingly did. Garibaldi began telling them of his cause, and of his adventures and escapades. Their interest soon turned to enthusiasm, then to devoted friendship. Meantime the landlord, fearing trouble in his inn, had sent for soldiers. When they arrived they found Garibaldi surrounded by defenders who repulsed the soldiers. His charm had won them over completely.

The World's Sixth

Poultry Congress

Meets In Berlin On July 24th Next Year

The preliminary announcement of the World's Poultry Congress which meets in Berlin next year has just been published. The Congress session will be held in the "Opera Kroll" and will be officially opened on July 24th by Chancellor Adolf Hitler.

During the Congress the afternoons will be devoted to excursions to places of interest within the city of Berlin and outside. At the close of the Congress the delegates will attend the opening ceremonies of the Olympic Games and then take a week's tour through rural Germany, including a trip down the Rhine. A six weeks' trip is being arranged for Canadians when France, Switzerland and Belgium also will be visited on the Continent, and a few days in England on the way home.

So far the following countries have definitely decided to participate: Canada, Argentina, Australia, China, Czechoslovakia, Great Britain, Ecuador, Estonia, Haiti, Holland, Hungary, Italy, Mexico, Norway, Southern Rhodesia, Sweden, Switzerland and the United States.

Teacher:—"How do you account for the phenomenon of dew?"

Student—"The earth revolves on its axis every 24 hours, and, in consequence of the tremendous pace, it perspires freely."

She—"I'm awfully glad you've got a part in the dramatic society's next show. Have you much to say?"

He—"Practically nothing. I'm playing the part of a husband."

For training airplane pilots a captive machine mounted on framework carried by a speedy motor truck is in use at a Pennsylvania airport.

CANADIAN COW HIGHEST LIVING FAT PRODUCER

Although now owned by R. V. Rasmussen of Deerfield, Ill., "Calamity Nig" above, is a Canadian-bred animal, bred by W. M. Davidson, Meadowvale, Ont., and developed by J. M. Fraser, Streetsville, Ontario. Sold in the Canadian National Holstein Sale in Toronto, her record has never been exceeded in the United States and has only been beaten twice in Canada, both times by Holstein cows now dead. At 8 years and seven months of age, she produced 34,615.7 pounds of milk and 1,327.9 pounds of fat in 365 days.

Rusted Wheat

High Protein Value Has Been Shown From Tests

High protein value of rusted wheats was noted in the second report on protein content of the 1935 crop issued by the federal grain research laboratory.

The special grades of No. 4, No. 5 and No. 6 established for the rusted wheats showed the No. 4 special with a protein content of 13.4 per cent.; No. 5, 13.1 per cent. and No. 6 13.3 per cent. Greater sale of the rusted wheat is expected to result. All protein results are computed on a 13.5 per cent. moisture basis.

Tests of other wheats made showed Alberta's crop running 14.2 per cent. for No. 1 hard, Saskatchewan 14.9 per cent. for No. 1 hard, and Manitoba tests showed 13 per cent. for No. 1 Northern. The results were about equal with 1934 tests.

Increased abundance of mosquitoes in 1934 as compared with previous years were reported from New Brunswick, Southern Quebec, certain sections of Ontario (Niagara Falls and Stamford areas of Welland county), the three Prairie Provinces and from the Kamloops and Cariboo districts of British Columbia where they constituted an exceptionally severe pest.

Puts Weight On Scales

Texas Inspector Finds Out Something About Electric Fan

Mrs. Housewife, don't forget to notice which way the fans blow in your favorite butcher shop.

That's the advice of W. S. Bussey, state inspector of weights and measures in Texas. He discloses that an electric fan in a Dallas meat store directly over the scales added from one-half to a full ounce to the apparent weight of a package, according to the speed of the fan and the size of the bundle.

Bussey was investigating reports of inaccurate measuring devices in Dallas stores and gasoline stations, when he made the discovery.

Cheap Amusement House

Penny Theatre Has Been Opened In Hamburg, Germany

A theatre has been opened at Hamburg in which every seat, including cloakroom and programme charges, costs a penny. It is called the "Hamburg Stage". In order to make this possible the manager, actors, stage hands, programme sellers and box office girls have collaborated in painting and arranging the scenery and making the costumes. Many unemployed actors are being given work at the theatre.

The SNAPSHOT GUILD

MEMORIES OF HOME

Pictures, such as this one, are not difficult to make so let your camera furnish you with "Memory Insurance."

Do you remember "way back when grandmother's "parlor" was furnished with the very latest horse-hair furniture, the lovely round "centre table" with its marble top, the huge portraits with their deep, heavy gilded frames and the always present "what-not" with its assorted display of "bric-a-brac"? Wouldn't you like to have a picture of it to help recall fond memories of days gone by?

Believe it or not but it will not be many years until you will be trying to picture in your mind some of the furniture and furnishings you had in your home when you were a child or perhaps when you were first married. Interior snapshots will serve as "memory insurance."

Don't put off taking these pictures any longer for making them is not at all difficult; in fact you will enjoy it. Here are a few pointers that may help you in making your first shots.

If you take your interior pictures in the daytime the chances are that you will have to take a time exposure unless your camera is equipped with a very fast lens, say f.3.5 or faster. If a time exposure is necessary you will have to use a tripod or else place the camera on some solid support such as a table. Even with an f.3.5 lens you should have some substantial support for your camera for you will probably find it necessary to take your shot at 1/5 or 1/10 of a second, and at speeds slower than 1/25 of a second it is extremely difficult to hold the camera steady. Any movement of the camera will cause a blurred picture.

The secret of success in indoor pictures lies in controlling the light reaching the various parts of the

room to be pictured. To begin with, never point your camera directly at the window or door through which the greatest amount of light is coming. Keep the light behind or to the side of the camera. If, as sometimes happens, a sunny window is in a particular part of the house you want to take, you can eliminate sunblare by a very simple trick. Pull the shade of that particular window clear down and keep it down for an exposure long enough to give you the other features and details. Then, close the shutter and run the shade up to its normal position. Now, go back to the camera and, without changing the film or the camera's position, open the shutter again for a half second longer.

It's a good idea to use a very small lens stop in taking indoor pictures, because you want detail. Focus on a point about half-way between the camera and the far side of the room; then, when the lens is stopped down you will find that practically everything is in sharp focus.

Avoid including large pieces of furniture in the foreground, lest they take up more space in the picture than they deserve.

Exposure time will vary, of course, with the brilliance of the daylight and the degree to which the walls reflect light. On a bright day, pictures in a predominantly light colored room can be taken with an exposure of five or ten seconds. On dull days, in dark rooms having only one window, you will need as much as five minutes, with the lens at f.16.

"Memory Insurance" costs but little; so load your camera to-day for interior pictures that in later years will be worth a lot.

JOHN VAN GUILDER

Newspaper Writer Makes Some Reflections Regarding Motor Speed Development

Wheat Testing

U.S. Test Of Thirteen Varieties Of Bread Made From Various Grades Of Wheat

United States Secretary of Agriculture Wallace invited reporters to become bread-tasters at his press conference in Washington.

He explained that agriculture department chemists had baked 13 loaves of bread from as many varieties of wheat, ranging in weight from 59 to 42 pounds per bushel, and in price from 55 cents to \$1.30. The object, Wallace said, was to determine the difference in taste in breads baked from different qualities of wheat.

You've noticed that I've picked some holes here and there," Wallace added, indicating bread slices on a table, but he asserted he could tell little differences between the loaves. Wallace said the trade was "talking about the millers importing 20,000,000 to 25,000,000 bushels of hard spring wheat from Canada" to meet demands for this quality. He asserted the United States has sufficient wheat, but that rust had caused a big loss in hard spring wheat which he said produces the finest quality of flour.

Fighting The Soil

Rehabilitating Farms Is One Of Dr. Archibald's Jobs

From his office in Ottawa Dr. E. S. Archibald is supervising the rehabilitation of western Canadian farms hit in the past few years by soil drifting and drought. It's a big task, but one which Dr. Archibald is capable of handling, for co-ordinating many enterprises is one of his specialties. When not busy rehabilitating farms he looks after the direction of the more than a score of experimental farms operated by the Dominion from coast to coast.

His additional work came about with the recent creation of a farm rehabilitation committee, and because of his knowledge and executive ability he was picked as chairman. Tree planting to form shelter belts for farms where the soil is so loose it blows away in wind storms; new method of farming which will allow the soil to stay put and not hinder the grain or livestock crop; the use of grasses to hold the soil together; and ways and means to keep water on farms in areas where it does not rain too frequently—these are some of the things which occupy Dr. Archibald's attention to-day.—Toronto Star Weekly.

Dog Is Good Fisherman

Dives After Perch And Picks Out Best Ones

T. K. Jackson, of Fulford Harbor, B.C., is the owner of a remarkable dog. "Tito", a small black canine with a predominant strain of Labrador in him, started a fishing career about five years ago. Seeing some herring in shallow water he grabbed one of them. Seeming to enjoy the sport he went back for more. Now "Tito" goes after perch and will swim out into deep water to dive for them. He takes only the palatable fish to his master.

Makes Visitors Welcome

Lord Ritchie Is Popular Chairman Of Port Of London Authority

The Port of London Authority must be one of the busiest institutions in the world, not least in respect of its reception of visitors. This is largely due to the hospitality of its chairman, Lord Ritchie of Dundee, who never misses an opportunity to show sight-seers from all over the world that they are welcome. He has just completed one of his heaviest months, but his pleasure in entertaining visitors seems inexhaustible.

Famous Grape Vine

The famous grape vine, known as the Kippen vine is now 44 years old, and its spread of branches this year is 300 feet. The crop is 2,014 bunches. This year an additional 300 bunches were cut when green, which, along with the thinnings, were used for grape jelly.

A newly-married couple left the church on a motor-cycle, the bride on the pillion. A cynical spectator remarked that this would probably be the last time she took a back seat.

At its maximum size, the average sun spot is about as large as the earth.

Behind the astounding record of 301.337 miles an hour made over a measured mile by Sir Malcolm Campbell lie a long experience in driving racing cars, superb courage and skill and 12 years of determination and scientific study. No mere accident is his performance. Nor is the Bluebird quite the same creature at which we marvelled when she began to break records in 1927. She is an evolution. Engineers and physicists have refined her lines, increased her engine power, given her stabilizers and ballast to hold her down, provided her with motor-controlled brakes, equipped her with strange instruments and devices and thus made of her the most remarkable organism that ever ran on wheels. For all her six tons she is a frail thing. Let her run at five miles a minute for only 15 consecutive minutes and she would be completely paralyzed. So tender are her tires that they are useless after a trial run or two—chemically disintegrated by heat. At the 2,500 revolutions a minute that they were probably making, their centrifugal force was enough to keep them distended without any air—also enough to fling off their treads like so much mud had they been much heavier. Perhaps Sir Malcolm's miraculous escape from death when one of them blew out may be attributed partly to this mechanical good fortune, partly to his rare presence of mind.

Out of the racing car of yesterday came the fast stock car of to-day. Speeds of 60 and 70 miles an hour on the open road are now a commonplace—speeds at which we gasped when they were made on the track by daredevils only 30 years ago. What of to-morrow? Does the new record mean that we, too, shall some day flash across the landscape at 100 and possibly 200 miles an hour?

The record made in Utah speaks for itself on these points. First of all rises the question of the road. The faster the vehicle, the straighter and smoother must it be. Once the sands of Florida were regarded as nearly ideal. Now their pebbles and shells, not to mention their limited length, have made it necessary to transfer trails at very high speed to the Bonneville Salt Flats of Utah. Is it likely that we shall have highways as mathematically straight as surveyors can make them for hundreds of miles and of a flatness that would match that of a billiard table and of an unprecedented width?

And then the car itself. A huge tail to keep us on the ground, a wind gauge or two on which a watchful eye must be kept, a mass of lead on which we must sit lest we soar off like birds, tires even sturdier than those now made for racing, since they must run for days instead of minutes; engines of a power unheard of in cars produced in large quantities—pile up the conditions in the light of what Sir Malcolm teaches us and the prospect of bowling along at speeds much higher than those that now seem irritatingly slow seems dubious indeed.—New York Times.

King George Suits Himself

Does Not Always Wear Kilt When Visiting Scotland

King George does not keep rigidly to the rule which King Edward enforced when the Court was in Scotland of wearing the Scottish dress whenever he left the Castle. The King wears the kilt of Royal Stuart tartan, on arrival at Ballater, but generally he wears knickerbockers and stockings. They are, in fact, his favorite dress. With them he wears a felt Homburg hat. The Princes emulate the King in this observance of dress. The Queen always wears a ribbon of tartans when abroad in Scotland.

Awaits Their Return

The two Peace Bridge robins, who tried for 14 days this spring to build a nest on a narrow iron ledge of the bridge at Fort Erie, Ont., and succeeded only when workmen erected a wooden platform for the birds, have gone south but their perch will remain intact awaiting their return next spring, Superintendent Louis Douglas, of the Canadian end of the Peace Bridge, ruled.

Protest has been made by lovers of Dickens' novels against the destruction for road purposes of the cottage Petersham, Surrey, where he wrote "David Copperfield."

There are more than 885,000 pension cases, covering all wars, on the U.S. government rolls.

BOY LOSES THUMB AND FINGERS PLAYING WITH DYNAMITE CAPS

Playing with a dynamite cap caused
loss of two fingers and a thumb
to a 10-year-old Bradner boy. He is
the son of Mr. and Mrs. Krntotick,
and said he found the cap on a stump.
He attached it to a fuse, intending to
throw it into the air, but it detonated
in his hand. He was treated at the
local hospital.

Library Notes

WAR !

Sir Norman Angell: "The Great Il-
lusion—1933" A re-statement of the
author's classic argument, first stated
in 1910 and vindicated by the Great
War and its aftermath, that commer-
cial land industrial well-being is not
dependent on armament and military
"security".

Sir Philip Gibbs: "Now It Can Be
Told". Written immediately after the
war, this book still stands as one of
the most valuable descriptions and
condemnations of modern warfare.

A. A. Milne: "Peace With Honor".
An ironical criticism of the obsolete
and insane convention of war.

Beverly Nichols: "Cry Havoc!" This
and the two following books describe
some of the sinister forces behind
wars and rumors of war.

A. F. Brockway: "The Bloody Traf-
fic".

H. C. Engelbrecht and P. C. Han-
glen: "Merchants of Death".

PEACE ?

Sir Norman Angell: "Preface to
Peace". An approach to the problem
of what is to be done, even if the
League of Nations is a failure or a
sham, and if no nation's assurance of
peace is worth the paper it is written
on.

H. N. Brailsford: "Property or
Peace". The thesis of the inevitable
sequence: private property, imperia-
lism, war, anarchy.

Gilbert Murray: "Ordeal of This
Generation".

J. W. Wheeler-Bennett "Pipe Dream
of Peace: The Story of the Collapse
of Disarmament."

The Next War...When ?

(Continued From Page Five)

their vaunted reforms have failed to
satisfy the people they misrule. And
we in America should see that no man
is ever given, no matter how grad-
ually or how noble and excellent the
man, the power to put this country
into a war which is now being pre-
pared and brought closer each day
with all the premeditation of a long-
planned murder. For when you give
power to an executive you do not
know who will be filling that position
when the time of crisis comes.

No Sweetness in War

They wrote in the old days that it
is sweet and fitting to die for one's
country. But in modern war there is
nothing sweet and fitting in your
dying. You will die like a dog for no
good reason. Hit in the head you will
die quickly and cleanly, even sweetly
and fittingly except for the white
blinding flash that never stops, unless
perhaps it is only the frontal bone or
your optic nerve that is smashed, or
your jaw carried away, or your
nose and cheek bones gone so you
can still think but you have no face
to look with. But if you are not hit
in the head you will be hit in the
chest, and choke in it, or in the low-
er belly, and feel it all slip and slide
loosely as you open, to spill out when
you try to get up, it's not supposed to
be so painful but they always scream
with it, its idea I suppose, or have
the flash, the slamming clang of
high explosive on a hard road and
find your legs are gone above the
knee, or maybe just below the knee,
or maybe just a foot gone and watch
the white bone sticking through
your puttee, or watch them take a
boot off with your foot a mush in-
side it, or feel an arm flop and learn
how a bone feels grating, or you will
burn, choke and vomit, or be blown
to hell a dozen ways, without sweet-
ness or fittingness; but none of this
means anything. No catalogue of
horrors ever kept men from war. Be-
fore the war you always think that
it's not you that dies. But you will
die, brother, if you go to it long
enough.

The only way to combat the mard-
er that is war is to show the dirty
combinations that make it and the
criminals and swine that hope for it
and the idiotic way they run it when
they get it so that an honest man
will distrust it as he would a racket
and refuse to be enslaved in it.

War Fought by Enslaved Men

If war was fought by those who
wanted to fight it and knew what they
were doing and liked it, or even un-
derstood it, then it would be defen-
sible. But those who want to go to
war, the elite, are killed off in the
first few months and the rest of the
war is fought by men who are en-
slaved into the bearing of arms and
are taught to be more afraid of sure
death from their officers if they run
than possible death if they stay in the
line or attack. Eventually their steady
increasing terror overcomes them
given the proper amount of bombard-
ment and a given intensity of fire,
and they all run and, if they get far
enough out of hand, for that army it
is over. Was there any allied army
which did not, sooner or later, run
during the last war? There is not
room here to list them.

No Victory in Modern War

In a modern war there is no victory.
The allies won the war but the
victors that marched in triumph
were not the men who fought the
war. The men who fought the war
were dead. More than seven million
of them were dead and it is the
murder of over seven million more
that an ex-corporal in the German
army and an ex-aviator and
former morphine addict drunk with
personal and military ambition and
fogged in a blood-stained muck of
misty patriotism look forward hyster-
ically today. Hitler wants war in
Europe as soon as he can get it. He
is an ex-corporal and he will not have
to fight in this one; only to make the
speeches. He himself has nothing to
lose by making war and everything to
gain.

Mussolini is an ex-corporal too,
but he is also an ex-anarchist, a great
opportunist, and a realist. He wants
no war in Europe. He will bluff in
Europe but he never means to fight
there. He can still remember what
the war was like himself and how he
left it after being wounded in an ac-
cident with an Italian trench mortar
and went back to newspaper work.
He does not want to fight in Europe
because he knows that anyone who
fights may lose, unless of course one
can arrange to fight Rumania, and
the first dictator who provokes a war
and loses it puts a stop to dictators
and their sons, for a long time.

Guerilla Warfare Hard to Suppress

A German colonel named Von
Lettow-Vorbeck with an original
force of 5000 troops, only two hun-
dred of whom were whites, fought
130,000 allied troops for a period of
over four years in Tanganyika and
Portuguese Africa and caused the ex-
penditure of 72,000,000 pounds ster-
ling. At the end of the war he was
still at large carrying on guerilla war-
fare.

If the Abyssinians choose to fight
on in guerilla warfare rather than

make peace Italy may find that Ethio-
pia will be an unhealing wound in
her side that will drain away her mo-
ney, her youth and her food supplies
and return men broken in health and
disgusted with suffering and the gov-
ernment that sent them to suffer
with promises of glory. It is the dis-
illusioned soldiers who overthrow a
regime.
It maybe that this war in Africa
will prolong the temporary peace in
Europe. In the meantime something
may happen to Hitler. But of the
hell broth that is brewing in Europe
we have no need to drink. Europe
has always fought, the intervals of
peace are only armistices. We were
fools to be sucked in once on a Eu-
ropean war and we should never be
sucked in again!—Ernest Heming-
way in "Esquire".

I am a Fisherman..
I like

because it is the finest tonic there is
for those who want to keep strong and
healthy. Lucky Lager gets its sparkle and
satisfying strength nature's way. It is
